Mohammed Abdullah

Senior Odoo Developer | ERP Implementation Specialist | Python & Fullstack Engineer

Cairo, Egypt · mohammed.hefzallah@gmail.com · +20 155 446 3171 · LinkedIn · GitHub · Open to Remote / GCC / International

Professional Summary

Senior Odoo Developer & ERP Consultant with **4 years of experience** delivering custom ERP solutions across Saudi Arabia, UAE, and Egypt. At an **Odoo Gold Partner**, managing 9 concurrent Odoo.sh environments (v17–v19) and leading full delivery lifecycles: requirements gathering, module architecture, data migration (v17 → v19), HRMS, POS, accounting, and REST API integrations (ZATCA e-invoicing, Neoleap, Telr, PayTabs). **Proven impact:** led a zero-data-loss migration of **63 custom modules**, accelerated complex database queries by **15%**, reduced warehouse return-entry errors by **20%**, and built production-grade React + TypeScript + PHP travel platforms and a delivery system processing **500+ daily orders with 99% reliability**. Combines deep Python/Odoo expertise with fullstack delivery and stakeholder leadership to drive ERP outcomes and regulatory compliance across GCC markets.

Professional Experience

Senior Odoo Developer Odoo Gold Partner · QS Solutions · Remote Apr 2026 – Present

- Directed **9 enterprise Odoo.sh ERP environments** across GCC for an Odoo Gold Partner, overseeing $100K+ in project budgets and leading cross-functional teams of business analysts and developers.
- Owned full delivery lifecycle for **all 9 clients**: from initial client scoping and system design to weekly agile sprints, code reviews, user acceptance testing, and zero-downtime production deployment.
- Engineered and delivered **40+ proprietary Saudi HRMS modules** for full Labor Law compliance (EOSB, Iqama, Air Tickets, Attendance, Payroll) across multiple enterprise clients (Odoo v18/v19).
- Rolled out a **full multi-domain ERP platform** for Al-Salhem (Odoo v19) covering HR, CRM, Sales, KPI dashboards, and Excel payroll reporting for 200+ employees.
- Established a **construction and education ERP** for UExperts (Odoo v17) covering job costing, asset management, and subcontractor billing; migrated legacy data from a custom PHP/MySQL system to Odoo PostgreSQL.
- Implemented multi-warehouse POS with **Neoleap payment integration**, custom return picking, and MRP serial number tracking for high-volume retail and manufacturing clients (Odoo v17/v19).

Odoo Developer (Part-Time) Wasla · Al-Sayed Hussein · Saudi Arabia · Remote Dec 2025 – Present

- Carried out a full **Odoo v17 → v19 migration** as sole developer — rewrote and validated **63 custom modules**, updated all ORM calls and XML views, and oversaw production release with zero data loss.
- Migrated POS (multi-branch, split payment, credit limits), ZATCA Phase 1 e-invoice, Telr payment, inventory reports, HR, and website modules — resolving **100% of v19 breaking changes**.

Odoo Developer (Contract) Hayah · Dubai · Remote Feb 2026 – Apr 2026

- Architected a Delivery Agent Management system from scratch covering assignment engine, real-time status tracking, and SLA performance reporting for **500+ daily shipments** at **99% uptime**.
- Integrated **SMSA Express and OneStock APIs**, automating 100% of shipment label generation for 500+ daily orders and eliminating 3+ hours of daily manual processing.
- Configured a scheduled PostgreSQL auto-backup module compressing and uploading **24 hourly snapshots** to Google Drive, achieving zero data loss risk across **3+ production databases**.

Partner Associate AZM Squad · Saudi Arabia · Remote Nov 2025 – Present

- Maintained Monshaat Government ERP (Odoo v11 Enterprise) supporting **1,000+ civil servants** across **10+ Saudi government departments**, ensuring 100% operational reliability with no unplanned downtime.
- Performed **12+ module upgrades** and data migrations across departments; trained 50+ government users on updated workflows, achieving zero operational disruption during all change deployments.

Odoo Developer Algoriza · Remote Jul 2022 – Nov 2025

- Shipped **10+ custom Odoo modules** (v14–v17) for high-traffic Saudi logistics and e-commerce portals; applied ORM optimization and PostgreSQL indexing strategies, reducing critical report query times by **15%**.
- Activated a bulk-scanner WMS module that eliminated **20% of warehouse return entry errors** across 1,000+ daily transactions, removing a recurring operational bottleneck worth hours of manual correction per day.

- Mentored **5 junior developers** through weekly code reviews; defined and documented Odoo v17 module architecture standards and agile sprint practices that were formally adopted as the team's development baseline.

Junior Odoo Developer (Internship) Algoriza · Remote Jan 2022 – Jun 2022

- Developed and released **5 custom Odoo modules** to production independently; refactored **50+ database queries** reducing report generation time by **15%**.
- Authored unit tests and technical documentation for 3 production modules actively used by **100+ end users**, reducing reported bugs by 40% post-release.

Freelance Projects

Fullstack Developer Diafat Kholoud, Diafat Somood, Noura Travel · Saudi Arabia 2025 – Present

- Generated 3 Arabic-first hotel booking platforms for the Saudi Umrah/tourism market as **sole fullstack developer** — from architecture and UI design to backend API, database, payment, and production deployment.
- Built React 18 + TypeScript + Vite + TailwindCSS + PWA frontend with mobile-first RTL design, achieving sub-2s load times and full offline support via Service Workers.
- Programmed a custom PHP MVC REST API + MySQL backend with hotel/room management, group booking engine, coupon system, user authentication, and full admin dashboard.
- Incorporated PayTabs payment gateway (live SAR transactions), Single Sign-On (SSO), Gemini AI recommendations, Leaflet maps, and PDF voucher generation.
- diaftkhulud.com | diyafahsomood.com | nouratravel.com

Frontend Developer Development Standards · Saudi Arabia 2025

- Designed and launched a responsive, multi-section corporate website for a Saudi B2B technology solutions firm, providing a clean, conversion-focused layout with instant messaging CTA, services showcase, and client portfolio. devestandards.com

Technical Skills

Core Competencies: Odoo ERP Development, Custom Module Development, Python Development, ERP Implementation, ERP Migration, Strategic Planning, HRMS, POS, REST API Integration, PostgreSQL, Odoo.sh, Multi-Company ERP, ZATCA E-Invoice, Agile Development, Team Leadership, Stakeholder Management, Client Communication, React, TypeScript

Languages	Python, JavaScript, TypeScript, PHP, SQL, XML, HTML5, CSS3
ERP Platform	Odoo v11, v14, v15, v16, v17, v18, v19 (Community & Enterprise)
Odoo Modules	HRMS, Payroll, POS, Accounting, Inventory/WMS, CRM, Sales, Manufacturing, Project Management, Website/eCommerce, Multi-Company ERP
Frontend	React 18, OWL (Odoo Web Library), QWeb Templates, TailwindCSS, Vite, PWA
Backend	Python ORM, PHP MVC, REST API Design, Webhook Architecture
Databases	PostgreSQL, MySQL, SQL Optimization, Query Performance Tuning
Integrations	PayTabs, Neoleap (POS), Telr, SMSA Express, OneStock, Aymkan, ZATCA e-Invoice (Saudi), Google Drive API, REST API Testing
Infrastructure	Odoo.sh (branching, staging, CI/CD deployment), Linux, Git, SSH
Compliance	Saudi Labor Law, ZATCA E-Invoice Phase 1/2, Hijri Calendar, ERP Strategic Planning

Education & Certifications

B.Sc. Computer Science New Cairo Academy, Cairo 2020 – 2024
Focus: Database Systems, ERP Architectures, and Software Engineering.

Odoo Functional Certification (v15) Odoo SA — Odoo Certified Professional 2024
Expert-level certification in Odoo functional workflows, module configuration, and ERP process design.
